

# Cisco Webex for Government from Verizon

Empower your workforce with the tools to collaborate and communicate while keeping costs under control

Your stakeholders may not work in the same office, but they need to work together as if they do. You need a solution that offers audio and video communication, as well as the ability to share data in real time.

Cisco Webex for Government from Verizon helps you hold more productive meetings — from any device, virtually anywhere in the world. Because Webex for Government is cloud-based you also benefit from flexible integration and predictable costs. You also get enterprise-grade security to help keep your meetings private.

**Collaboration is vital to keeping your organization running. The latest conferencing services help your dispersed teams do just that. But not every solution is the same.**

## Keep your meetings on track

Virtual meetings help your remote teams conduct more effective meetings — participants can share documents in real-time. Our solution also makes it easier to manage the meeting once it starts thanks to features like an integrated list of meeting attendees, participant dial back and active speaker icons.

## Collaborate virtually anywhere, on any device

Empower your people to join meetings from any device, whether it's from a regular phone, smartphone, a desktop or tablet. Webex for Government connects all participants, employees, other agency workers and external contractors. Now you can effectively collaborate with anyone, virtually anywhere in the world.

**Webex for Government is FedRAMP authorized. Gain a cost-effective and reliable approach for the adoption and use of cloud services by U.S. government agencies.**

**Leverage your existing PBX for end-to-end conferencing**

Webex for Government pairs Verizon’s global IP network with Cisco’s Cloud Collaboration solutions, so you benefit from an end-to-end solution. With Webex CCA you can use your on-premise IP telephony network to provide integrated audio for Webex Meetings.

Our solution also provides toll and toll-free numbers, and gives attendees the option to connect using Voice over IP (VoIP) via their computers’ built-in audio capability. You’ll experience outstanding audio quality, even over low-bandwidth networks, with wideband audio support for VoIP.

**Key Benefits:**

**Provide an exceptional user experience** with integrated audio, video and web conferencing across any type of device.

**Extend investments** in existing infrastructure and simplify IT management by transparently adding audio conferencing into existing data and voice infrastructure.

**Scale conferencing capabilities** to more users, stay current with advanced features, and reduce complexity with upgrades delivered quickly and automatically from the Cisco Collaboration Cloud.

**Predict monthly budgets** with ports-based pricing, and control costs by eliminating PSTN transport and termination charges for on-net users.

**Scalable, predictable cost management**

With Webex for Government, you can add connections to your solution as and when your agency needs them — scale up as and when you need to.

It also helps you manage your budget by removing standard bridging charges — you connect directly to Cisco’s Webex audio bridge. And it provides toll-free or local phone number access for participants.

**FedRAMP authorized**

Gain a FedRAMP authorized, cost-effective, secure approach for the adoption and use of cloud collaboration services. By standardizing security controls and processes, the FedRamp program can deliver a cost effective solution with an accelerated implementation. You can be confident in the security of the cloud technologies you’re using. To learn more about FedRAMP, [visit fedramp.gov](http://fedramp.gov).

**Cloud Connected Audio (CCA) capitalizes on Verizon’s SIP connections and Cisco’s FedRAMP CCA/Webex to help control your audio conferencing costs.**
