

Verizon's Corporate Employee Phone Program

Reduce the workload for your IT department and enhance employee experience.

Give your employees more control on their company issued devices.

Now you can enable your employees with the ability to manage their own lines via MyBusiness using their own login. You set up the controls and permissions you desire and they do the rest.

Additional benefits of the program:

- Retain your business numbers when employees leave the business.
- Layer on a mobile security solution that fits the needs of your business.
- End user access will have access to the MyBiz online portal to make approved changes to the account.

Contact a local representative for more information.
