

# 5G: Driving Real-Time Connected Patient Care

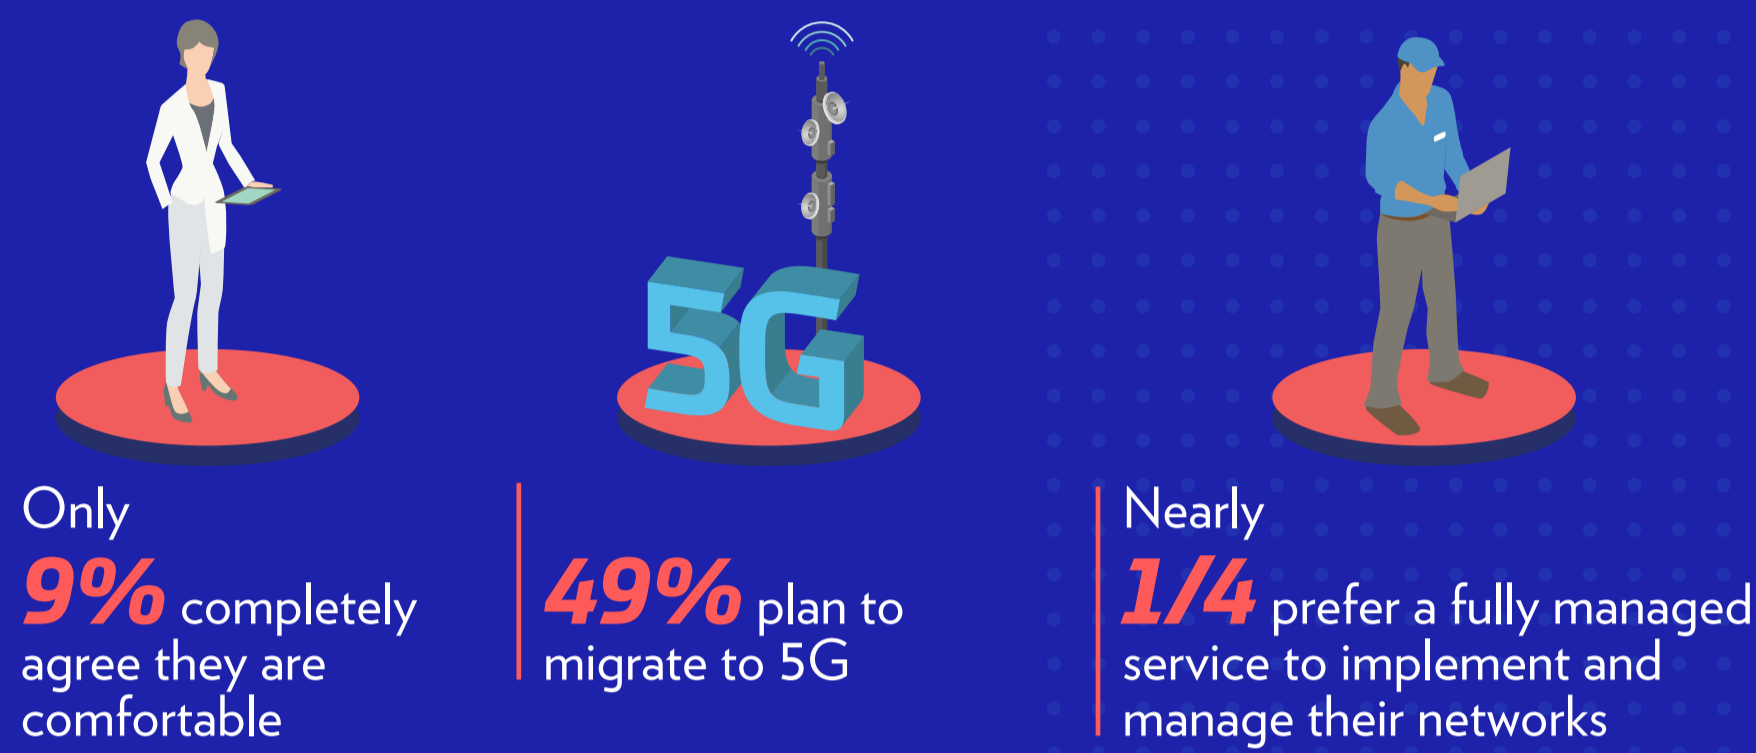

Though 85% of healthcare IT leaders call WiFi a critical main form of communication in providing patient care, close to 1/2 say their organizations plan to migrate to 5G, according to new HIMSS Market Intelligence research.\*

## Here's what's on the minds of surveyed hospital IT decision-makers:

### Top WiFi challenges or concerns

### Respondents are not completely comfortable with their current WiFi infrastructure

### They see or envision positive 5G impact

**Harness the great possibilities of real-time data and accelerated digital health. Learn more about the power of 5G at [Verizon](https://www.verizon.com/5g).**
